## Professional Photo Editing Software Free

Fast, Easy Photo Editing Software PortraitPro is the world's best selling retouching software. • Edit or replace the background and add stickers, logos or overlays • Over 100,000 PortraitPro users around the world. And see what it can do. • Download the free trial and see what it can do The Best Photo Editing Software Programs. Photo Editing that Pushes the Boundaries PhotoDirector features a wide range of copy-to-see, professional-quality tools built specifically for turning your photos into stunning artworks no matter how you shoot. • Detects the face, age and gender • Locates features, skin, hair and background areas. • Make-up, retouching and face sculpting controls for complete creative control. To find the best photo editing software, we pitted the best programs tech giant Adobe has to offer (Photoshop, Lightroom, and Photo Elements) against three highly commended competitors to find out which one was user friendly enough for beginners and powerful enough for professionals. • Automatically retouches the photo with customizable presets • Fully adjustable retouching using sliders. Using Artificial Intelligence, PortraitPro enhances every aspect of a portrait for beautiful results.
